WHY DO A CONTACT CENTER ASSESSMENT?

To meet elevated customer expectations, businesses must provide personalized, optimal experiences on all channels. This requires being accessible across all platforms, continuously improving customer experience, and putting the customer first.

78% of consumers have bailed on a transaction or not made an intended purchase because of a poor customer experience.

How it works?

Through key stakeholder interviews, focus groups and the observation of current processes, tools and technology, GTS will assess your current state of your contact center's technology.

Areas of focus?

Areas of focus can include.

Artificial Intelligence

Contact Routing

Bots and Automation

Voice and IVR

Quality Assurance

Self-service

Omni-channel

Workforce Management

... and more

THE TIME IS NOW

With more channels and touchpoints emerging, it is crucial for businesses to identify new opportunities to get ahead of this competition.

WHERE TO START?

A **contact center assessment** is a starting point. It identifies areas for improvement and helps develop a strategy centered on the customer.

TAP INTO OUR EXPERTS TO KEEP YOUR CONTACT CENTER RUNNING FLAWLESSLY

Your contact center is the front-door to customer experience. It is the first point of interaction between a customer and your company, and as such, it plays a crucial role in shaping a customer's perception of your company.

OUR PROCESS

A contact center assessment assesses customer-brand interactions across all channels in your contact center and identifies opportunities for improvement. The assessment employs service design techniques and results in a prioritized action plan for maximum impact on both the business and customers.
