GTS

AWS CLOUD

SECURE. SCALABLE. COST-EFFECTIVE

GET ON YOUR CLOUD JOURNEY WITH GTS AND AWS

The AWS Cloud not only provides a secure, scalable, and cost-effective infrastructure but also enables teams to innovate at a faster pace. With automated CI/CD, teams can quickly launch new features. Data centralization on AWS allows businesses to make data-driven decisions with modern big data analytics and create new revenue streams and businesses with cloud-enabled IoT products.

Whether you aim to migrate your infrastructure, modernize your applications, or enable remote work, AWS & GTS can assist you in achieving your goals.

aws PARTNER Advanced Tier Services

Migration

Improve efficiency by retiring hardware and moving your applications, websites, and enterprise IT to an on-demand infrastructure

Application Modernization

Replatform your business application in AWS Cloud to reduce downtime and get a higher ROI.

Transform DevOps

Streamline operations and boost productivity by integrating the development, QA, and IT Ops teams, and automating the continuous delivery of software and infrastructure changes.

Architecture & Engineering

We help you with all aspects of migration to the cloud and digital transformation.

GTS eases organizations' cloud journey with AWS by offering expert guidance and support. GTS' deep knowledge of AWS and successful migration experience ensure a seamless transition to the cloud. From planning to ongoing support, GTS offers a comprehensive approach for a smooth and successful cloud adoption with AWS.

START YOUR CLOUD JOURNEY WITH GTS AND AWS

Jumpstarting your cloud journey on AWS can provide a solid foundation for your organization's digital transformation, with access to a wide range of tools and services to build, deploy, and scale applications in a secure and reliable environment.

INNOVATE WITH GTS AND AWS

It's not as scary as it sounds. And it's essentially a modern-day requirement for any organization that has a large base of customers.

Our speciality is in enabling a low-friction journey from on-premises to cloud. Any migration will come with some bumps and bruises. That's normal. But we've seen it all and are ready to innovate with you.
Cloud Cost Optimization

Cost Optimization - Actionable insight into usage from FinOps optimization platform. Monthly reviews and recommendations

Cloud Application Development

As a cloud app development partner, we use advanced technology and the best of all cloud services to deliver scalable, secure, and optimized solutions that maximize ROI. We specialize in Serverless Application Development, and end-to-end design & implementation.

Customer Experience

GTS is dedicated to delivering innovative customer experiences. We integrate AWS customer experience solutions and engagement services to provide customized solutions. Our partnership with Amazon Connect allows us to swiftly tackle complex contact center challenges at scale.

Extended Team On-Demand

Our service model offers on-demand access to AWS expertise. With this flexible and collaborative approach to professional services, you can adjust scope and priorities as needed while working closely with our AWS experts to build, migrate, optimize, and maintain your cloud environment.

Data and Analytics

From extracting insights from data to applying advance AI/Model for intent mining, we do it all. We will help you with data migration, data engineering, AI & ML and data operations.
